MONITORING & SUPERVISION

Only the systematic supervision and proper recording can bring a security arrangement closer to perfection. At King Force, We have four stage of monitoring, supervision, inspection and recording system depending on the strength of the post, nature of the duty desired by the client and the modus operandi. All this is meticulously planned by the Headquarters to meet the above requirements. Over the years, we have gained extensive experience to strength our Monitoring System to achieve our objective.

FIELD SUPERVISOR:

Depending on the strength of the post and the nature of duty we suggest that our clients to employ guard supervisors / guard commanders to supervise the guards on duty. The supervisors' duty is to ensure that the guards perform duties properly and remain alert. Usually the guard supervisors do shift duties along with the guards. The guard supervisor duty include maintenance of duty register in the post, visitor's record, any special instruction from the authority etc.

He is also responsible to the roving Inspector/Shift inspectors of the King Force Headquarters to report any incidents/occurrences.

ZONE INSPECTOR:

We have divided the Dhaka city into various zones for our operational purpose. For each zone, we have Shift/Zone inspectors who have to visit to a post under his area at least once during his tenure of duty. During his visit to a post, he has to check the guards, listen to the post supervisor (if posted), sign the duty card held in person by the guard and write his remarks on the post register. Upon return to the Headquarter, he has to discuss the observed irregularities with the operation officer and record his observations in the inspection register. Inspectors are generally provided with motorcycles or bicycles.

SURPRISE CHECKING:

Surprise checks are carried out occasionally by the operation/duty officer without any prior notice. Sometimes the General Manager (Operation) or even the Managing Director visit the sensitive and important posts to keep himself abreast with the ongoing situation taking place on the ground. We also carry out surprise checks as response to any client complaints.

NIGHT CHECKING:

KING FORCE Headquarters arranges night checking every day in every zone. The duty roster for night checking is planned by the Operation Director in consultation with the General Manager (Operation). Three different teams carry out night checking every night. In addition, to dedicate night supervisor of the zone, two teams of officers, one in vehicle and another one on motorcycle carries out supervision at night.

FIRE FIGHTING

In order to understand how fire extinguishers work, you first need to know a little about combustion. Unfortunately, it is impossible in this short introduction to completely describe all the complex chemical and physical reactions that take place during a fire. However, this page will attempt to introduce the fundamental theories of fire and explosion.

For many years the concept of fire was symbolized by the Triangle of Combustion and represented, fuel, heat, and oxygen. Further fire research determined that a fourth element, a chemical chain reaction, was a necessary component of fire. The fire triangle was changed to a fire tetrahedron to reflect this fourth element.

A tetrahedron can be described as a pyramid which is a solid having four plane faces. Essentially all four elements must be present for fire to occur, fuel, heat, oxygen, and a chemical chain reaction. Removal of any one of these essential elements will result in the fire being extinguished.
